- billboard frame mounting on buildings
- hanging scaffold assembly
- changing constructive elements in different facilities

## Rock scaling and placing the safety grid

---

## NDT - Non-destructive testing

---

## Window cleaning

---

Access to difficult places and rope-supported work has the advantage that lifting platforms are not needed. This greatly reduces the element of cost involved and thus leads to higher efficiency. Fast and uncomplicated access to a work location prevents unnecessary intrusion into the surrounding work environment.

## Take a probe from Industrial chimney

---

## Mounting WiFi sector antenna

---

## Facade

---

Thank you for the time  
you spend on my portfolio
